*This book is great. I have go through and so i am confident that i will going to read through once again again in the future. I am just easily can get a satisfaction of looking at a written book.  
(Miss Vernie Schimmel)*

## EXCURSIONS: IN NORTHERN BRITISH COLUMBIA AND YUKON TERRITORY AND ALONG THE NORTH PACIFIC COAST (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Excursions: In Northern British Columbia and Yukon Territory and Along the North Pacific Coast The journey along the North Pacific Coast from Vancouver to Prince Rupert is made by ocean steamer. The distance is about 500 miles(804 km.), and the time occupied usually about 36 hours. The journey is continuous, no stops being made; and as much of the coastline is passed in the night, only a brief general description is necessary. Physical Features of the Coast. The route from Vancouver northward along the Pacific Coast follows a long, partially submerged, island-filled depression, bordered continuously on the east by the Coast range and interruptedly on the west by the long mountain ridges of Vancouver and the Queen Charlotte islands. The Coast range is a deeply dissected granitic ridge usually from 60 to 80 miles (96 to 128 km.) in width. It rises directly from the sea with few intervening flats or plateaus to height of 4,000 to 5,000 feet (1,219 to 1,524 m.), gradually increasing towards the axis of the range to 7,000 or 8,000 feet(2,133 to 2,438 m.)The mountains and mountain ridges are massively built elevations with steep, often craggy, slopes terminating in rounded, domeshaped, and pyramidal summits. The heights as a rule are very uniform, although a few peaks rise to a considerable elevation above the general level. Deep, ice-worn, steep-sided valleys, often terminating in living glaciers, penetrate the range in all directions, and form one of its most characteristic features. The lower slopes of the mountains, where not too precipitous, are covered everywhere up to a height of 4,000 feet(1,210 m.)with a dense coniferous forest. A fiord system is well developed all...
