The EGOV Conference Series intends to assess the state of the art in e-Government and to provide guidance for research and development in this fast-moving field. The annual conferences bring together leading research experts and professionals from all over the globe. Thus, EGOV 2003 in Prague built on the achievements of the 1st EGOV Conference (Aix-en-Provence, 2002), which provided an illustrative overview of e-Government activities. This year the interest even increased: nearly 100 contributions, and authors coming from 34 countries. In this way EGOV Conference 2003 was a reunion for professionals from all over the globe. EGOV 2003 brought some changes in the outline and structure of the conference. In line with the broadening of the field and a growing number of submissions it became necessary to decentralize the reviewing process. So reviewing was done via stream chairs who deserve high praise for their dedicated work. In addition, a workshop part was included to cover some subjects of emerging significance, such as dissemination, networking, and regional developments. Further, a subtitle of the conference was chosen that would mirror the expansion of e-Government to e-Governance. Consequently, in this year's conference governance, democratic deliberation and legal issues occupied a growing share. Last, but not least, GIS was incorporated as a topic due to the increasing importance of geographical information systems for planning and operations. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
